

Skydiving

As we get old we stop to challenge us at all
As the time moves on we do what we always done
So one day we thought as we looked up in the sky
Lets just do it with no regrets at all

They said it would be god to go away this day
After all the rain the sun would shine today
So this day we,re going up into the air
And let the wind that blows just carry us away

Skydiving

Going down the mountain sides

Skydiving

Look at the world from a different view

We gathered on the top and the instructions they were clear
There's nothing to worry 'bout just run and you will see
So we did just that we ran into the air
And when we left the ground it all felt so Unreal.

Skydiving...

**Winds they blow and things they drift away
And with the winds the moments tend to pass us by**

**But floating in the air we couldn't do another thing
Just enjoy the moment that happened there and then**

So back on the ground the moment it was gone
But we did still remember the time spent flying high
And now we know that sometimes you must look
At the world and things from a different view

Skydiving...
